Color Tape

This standard labelling tape comes in a wide variety of colors. Using labels color-coded according to the objects to be labeled or their purpose makes it easy to organise and manage things.

Cable Flexible Tape

This tape conforms to curved surfaces such as cables and bottles.

*Suitable for use with USB cables and other cables with connectors

Heat Shrink Tube

These fabric tubes shrink when heat is applied. Pass a cable through a tube and apply hot air using an industrial hot-air gun to shrink the tube to fit the cable.

*Suitable for use with conductor wire without connectors and other cables of smaller diameter than the tubes
*Tubes shrink when hot air of from 90°C to 270°C is applied.

Paper Tape

This is affordable paper tape. The tape surface is coated to increase print permanence.

* Use indoors away from direct sunlight.

Fluorescent Tape

These fluorescent colored tapes are great for producing labels with high visual impact.

A varied selection of label tapes for use almost anywhere

New High-Strength Adhesive Tape -No Residue -Cover up

This tape uses a newly developed adhesive that is very strong and leaves no residue when labels are removed. When used for over-labeling, it covers up the surface.

Labels peel off cleanly.

Comparing to other adhesives, this product doesn't leave any residue.

The tape covers up the surface.

In an over-labeling comparison test, the new adhesive tape completely covers the surface.

*1 BLACK on SILVER not available in 6 mm width

New Tape for Oily Surfaces

This tape uses an adhesive that can absorb oil from the surface. Labels can be attached to surfaces contaminated with salad oil, sesame oil, olive oil, lubricating oil, engine oil, anti-rust oil, or other types of oil or grease.

* If a surface is heavily covered with oil, the tape may not reach full adhesive power.

New Tamper-Evident Tape

This tape leaves the word "VOID" on the application surface when removed, making it possible to detect whether labels have been removed. It is effective for applications such as anti-tampering security and protection of confidential information.

* If applied to hard-to-stick surfaces, VOID pattern might not be left sufficiently when the label is peeled off.

Magnetic Tape

The back of the tape is magnetized, so labels can be attached to whiteboards, fridges, and other metallic surfaces.

Iron-On Fabric Tape

This tape can be attached directly to fabrics using a clothes iron.
